

Objective: To apply my skills and knowledge in repairing, maintaining, servicing aircraft and implementing safety regulations to enhance the company's goal and objective by becoming an asset.

ACCOMPLISHMENTS AND AWARDS

- Recipient of the **Arthur Parry Memorial Award** that shows excellence in the field of Aircraft Maintenance engineering.
- Recipient of the **Lesley Russell scholarship** for hard work and dedication in labs and classroom.

HIGHLIGHT OF QUALIFICATION

- Excellent communication skills gained by establishing a regular communication with colleagues and customers
- I hold a Valid purple Airside **RAIC** Clearance and **AVOP D/A** classification at Toronto Pearson Airport
- Strong ability to follow up and handle projects from development to implementation
- I am a holder of Aircraft Certification Authority on **CRJ 100/200** and cross trained on MOC.
- Excellent troubleshooting abilities gained while working on different Aircraft systems and tools while on the ramp
- Manage efficiently in a multi-tasked environment. Ability to organize and manage multiple priorities evident by working at Air Canada, Air Georgian where multi-tasking is crucial in order to deal with multiple AOG and multiple functions on the equipment and carrying high power engine runs and taxing aircraft at YYZ.
- More than 6 years' experience working in fast-paced environments of Air Georgian, Air Canada, McDonalds, 241 Pizza where customer satisfaction, team work and interpersonal interaction are top priority
- Demonstrated strong self-motivation and time management skills in ability to maintain high academic standing while working, volunteering and participating in several activities.
- Ability to work independently and in a team environment while being safety oriented. Always excelled in group projects.
- Strong mechanical aptitude evident by receiving Arthur Parry Memorial
- Award Experience working with individuals from diverse backgrounds
- Flexible in adjusting to changing work priorities.
- Current Human Factors training.
- Excellent computer skills and ability to learn and adapt
- Currently hold G driver's license and Radio telephone operators license
- Skilled in using different type of equipment for repair and maintenance
- Mechanic/Technical oriented skills include:
 - Electrical
 - Avionics
 - M2 Aircraft System
 - Maintenance Procedures
 - Canadian Aircraft Regulations
 - Turbine engines
 - Turbine Propeller
 - Sheet Metal
 - Knowledge of Aircraft De-icing and related de-icing equipment
 - Knowledge of Aircraft operations, flight surfaces, and basic principles of flight

EDUCATION

Aircraft Maintenance Program (with accreditation) CENTENNIAL COLLEGE

Aug 2013-May 2015

WORK EXPERIENCE

Licensed Aircraft Maintenance Engineer M2 on Contract

- Responsible for performing Line maintenance checks in 737 and carry out scheduled Inspection in the hangar at Canadian North Edmonton.

Oct 2020- Jan 2021

Licensed Aircraft Maintenance Engineer M2 at Air Canada

Feb 2020 -Apr 2020

- Responsible for performing scheduled maintenance, defect rectification, and troubleshooting Company and customer aircraft
- Performing work IAW applicable task cards, AD and Service Bulletins

Licensed Aircraft Maintenance Engineer M2 at Air Georgian.

Oct 2017- Feb 2020

- Ensuring any issues that could jeopardize production or airworthiness are raised in a timely manner.
- Ensuring airworthiness and safety policies, processes and standards are complied with.
- Performing work in accordance with the applicable AMM/AD and Service Bulletins.
- Experience working both in ramp maintenance and hangar.
- Perform routine pre-flight inspections of engines, mechanical systems and aircraft frames.

Aircraft Maintenance Apprentice at Chartright Air.

Mar 2017-Sept 2017

- Check tire pressure and look for cuts or leakage of fluids in the Main & Nose landing gear
- Experience removing and installation of Landing gear from Challenger 300
- Experience on Daily inspection on some of the following Aircraft:
- Bombardier Challenger 601,605,650.
- Cessna Citation 560 ultra and Cessna 650

Aircraft De-icing Specialist

Aug 2015- May 2017

- Responsible for operating de-icing vehicles and auxiliary ground support equipment to facilitate the GTAA Aircraft Ground De-icing Program.
- Utilizing De-icing equipment to remove ice and snow contamination off aircraft surfaces.
- Helping in the process of timely flight departures during snow events.
- Performing airfield security detail and escort duties as required.
- Conduct aircraft post de/anti-icing inspections and tactile inspections.
- Generate and maintain records and logs.
- Perform ramp servicing/ground handling functions as required.

VOLUNTEER & EDUCATION EXPERIENCE

Air Georgian OHS Committee Member

- Assist the company's goal in reducing/eliminating Workplace injuries/illnesses and fatalities
- Work Together to identify and solve health and safety problem

AME Association of Ontario

Volunteer with the Aircraft Maintenance Engineers Association of Ontario at the meetings and Annual Symposium held in September every year.

Thank you for giving me your consideration
